

Unwinding My Catholic Education: A Memoir of Discovery and Recovery

How are parochial schoolchildren affected by the rigid dogma they're taught to believe? Are the negative effects lifelong? Is recovery possible? Such questions are central to this rich little memoir about an author who's born into a staunch Catholic community, manages to walk away from the Church as a young adult, and quickly learns that leaving the faith isn't enough to free her from the "raised-Catholic syndrome." After seeking and finding no professional help, she embarks on a lifelong quest to unwind her parochial education. Episodes from the author's journey of recovery alternate with stories from her childhood that illustrate the "three worst things" she learned in Catholic school. Readers observe the child who's being indoctrinated and the adult who's reversing the indoctrination—assisted by a gentle physicist, a rare psychologist, and a physician who's compelled to study "Roman-collar crime." This book is recommended for ex-Catholics and other former Fundamentalists, parents, teachers, and anyone who's interested in the negative effects of dogmatic religion.
